### TEST COMMENTS:

*Planting conditions were excellent but dry, and the seed sat in the ground for 17 days before rain helped full emergence. Rainfall came "just in time" all season, with enough moisture prior to, and during silking, to allow great pollination. Corn stood well at harvest, with minor stalk lodging in some plots. The corn grew taller than normal this year, due to the warm temps and deep roots. Rainfall from May 1 through Sept was 18.9", vs. 23.6" for the long-term average.*
